ABOUT ME

Backend developer with hands-on experience in Python (web scraping, automation) and PHP/MySQL (full-stack applications). Built and deployed tools including an e-commerce price scraper, a music platform for independent artists, and published browser extensions used by real users. Strong focus on clean, maintainable code, database driven solutions, and solving practical problems through technology.

SKILLS

- Languages: Python, JavaScript, Php
- Frameworks: Laravel, Selenium, Scrapy, BeautifulSoup
- Databases: MySQL, Redis
- Web Scraping, Git, GitHub

WORK EXPERIENCE

Netclues Technologies - Laravel Backend Dev [Nov 2025 - May 2026]:

Making live production changes and maintaining folder structure for full-stack Laravel (MVC) applications. Handled performance improvements and security hardening.

Jashvi Infotech - Freelance Graphic Designer [Jul 2025 - Aug 2025]:

Designed and produced social media content (graphics, reels) to strategically boost client business growth.

Imbuesoft LLP - Digital Marketing Intern [May 2023 - Jun 2023]:

Executed digital marketing campaigns to boost Vistaderm's brand visibility and client business.

SOFT SKILLS

- Team Building
- Creativity
- Critical Thinking

PROJECTS

Price Scraper

Developed an automated Python price scraper (Scrapy, MySQL) that automates data retrieval, scheduling, and error handling for 5+ e-commerce sites. It powers a comparison engine, enabling users to track products and make informed purchasing decisions.

Ghost Clean

PUBLISHED ON FIREFOX

Ghost Clean is a firefox extension that instantly clears your browsing data like history, cookies, cache, downloads, passwords, and more and then opens a fresh new tab after cleanup. One click and your browser is wiped clean.

Flutter Recon

Flutter Recon automatically detects Flutter-powered websites, scans publicly accessible resources, analyzes source maps, fingerprints third-party packages, and provides a detailed breakdown of the technologies used within a Flutter Web application.

DataHarvester

DataHarvester: A step-by-step OSINT guide to start with just a name and discover public accounts, social profiles, and other digital traces - all legal, passive, and educational.
